

F8 Geography revision Nov 2018

Please use the ISEB Geography 13+ Revision Guide:

Plenty available on Amazon.

Fieldwork

The last few weeks have been focused on completing the fieldwork write-ups. Most are in but a few children have sent emails to themselves to complete over half term. Please note it **MUST** be their own work. Its fine for you to read over and make recommendations but the work must be original and completed by them.

Exam

The three children who covered the syllabus with me last year will sit the whole paper. For the rest of CE candidates in Y8, the exam will contain the following sections:

OS map work:
Direction
Orientation (8 points of the compass)
Grid references
Distance
Area (grid square = 1km ²)
Height and relief (contours, spot heights)
Cross-sections
Follow routes
Identify relief and landscape features
Understand site, situation and shape of settlements
Settlements
Settlement patterns
Functions of a settlement
Size and situation of a settlement
Global location
Major global features
Other global features
British Isles
Countries
Major cities and city states

Weather and climate
Difference between weather and climate
Microclimates
The water cycle
Types of Rainfall
Causes of temperature and rainfall variation across the British Isles
Rivers and coasts
Processes of weathering
Erosion, transportation and deposition
Formation of each landform (including annotated diagram):
Valley
Waterfall
Gorge
Meander
Caves, arches, stacks, stumps
Beaches and spits
Causes, effects, responses to a flood
Transport and Industry
Value of transport routes
Principal modes of transport
4 industry sectors of economic activity
Can economic development be sustainable?
